- Zustand

Backend
- Laravel
- PHP
- Prisma
- Express

Database
- MySQL
- PostgreSQL
- Supabase

Soft Skills
- Problem Solving
- Critical Thinking
- Communication
- Teaching & Mentoring

PROFILE

I'm Juan Stevenson, a computer science student based in Semarang with over 3.5 years of experience in fullstack web development. I specialize in building web apps using React, Next.js, and Laravel. Passionate about solving real-world problems, I enjoy working on both personal and collaborative projects. Always learning and aiming to become a professional website developer.

EXPERIENCE

BTNG   **September- October 2024**
Frontend Developer & Event Instructor

Developed the event registration website for new university students. Worked on a visually rich UI using Tailwind CSS and Daisy UI. Integrated form submission via API and supported exporting data directly to Excel.

Dinacom   **January- February 2025**
Fullstack Developer

Built a competition platform for Dinacom, handling user registration, proposal submission, and payment workflows. Created a multi-phase registration flow with conditional logic based on user role and education level.

CinemaTix   **2024-Present**
Fullstack Developer & Project Manager

Led the development of a movie web app with Spotify-style features. Implemented a unique ticket generator that lets users share their movie watchlists as printable ticket images on social media.
